

VividBoards for Women's Health

Women's Health Departments work hard to create and maintain a calm, soothing, relaxing atmosphere for women hospitalized with issues specific to females—especially expectant and new mothers.

Outdated, blank, dirty whiteboards can leave a bad impression and reduce satisfaction, preventing future hospital stays at your facility.

Using a pastel pallet, our Women's Health patient room boards are designed to be aesthetically pleasing to your patients, yet functional and easy to use for your specialized staff. Now, important information can be captured, easily updated and shared, including:

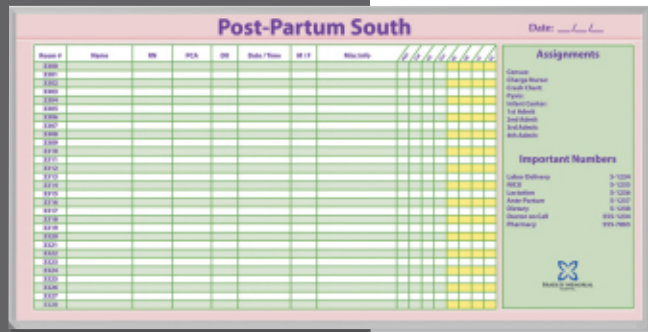

- Time of last exam
- Plan of care for the day
- Needs for discharge
- Newborn feeding information
- Anesthesia choices
- Pain scales so levels can be viewed at a glance

Patient Room Boards also include:

- Space for staff, families and patients to leave comments or ask questions
- Pre-printed visiting hours, room numbers and phone numbers (such as dietary and NICU) to eliminate the need to rewrite information—ensures patients are well informed of their surroundings and saves valuable time
- Bi-lingual versions to satisfy the needs of all patients
- Branding with the facility's logo to maintain hospital loyalty and recognition
- Sleek, modern framing to prevent visitors from accidentally marking on walls
- Secure pen coils so that markers don't disappear

Contact us today to improve the look of your Women's Health patient rooms, increase your staff productivity and improve patient satisfaction.

Large Nurses' Station Boards

Features and Benefits:

- Easily updated as patients are admitted and discharged
- Staff assignments can always be viewed so adjustments can be made for shift changes
- Quickly communicate changes in case priorities
- Customizable columns so that the board contains the specific information your unit needs
- Rows and borders can be any color you choose to match your hospital décor
- Segregated section for use by other departments such as lactation and social services

Because admissions and discharges are frequent in Women's Health departments, VividBoard's large Nurses' Station boards (often referred to as Bed Boards) include a green bar design to make it easy to follow information and quickly obtain the data your staff needs to efficiently take care of all your patients. This is critically important when trying to keep track of expectant and new mothers in a busy, frequently changing unit.

Nurses' Station boards are framed in brushed aluminum and include a marker tray. All VividBoards for Women's Health are produced using a patented coating process. Images are sublimated into the board as opposed to silk-screened where the ink is placed on top of the board.

- Writing and dust won't get caught in the surface of the printing, making the boards appear dirty and scratched.
- Because there is no raised surface, the boards can be cleaned with any hospital cleaning supplies.
- Highly resistant to stains, fading and blemishes, maintaining the appearance your Women's Health Department demands.

In addition, be assured that VividBoards are produced using an environmentally friendly process to ensure your hospital's high green standards are met.
